## Professional Summary

---

Junior PHP Laravel Developer with 6 months of hands-on experience in PHP, Laravel, MySQL, REST API development, and third-party API integration. Experienced in MVC architecture, PHP OOP, database design, authentication, role-based access control, debugging, and production support. Built and deployed Laravel applications for ERP, billing, inventory, and e-commerce use cases. Strong problem-solving and troubleshooting skills with experience using Git/GitHub and collaborating with development teams. Seeking a Junior PHP Laravel Developer opportunity in Coimbatore.

## Technical Skills

---

**Languages:** PHP, JavaScript, SQL, Java, HTML5, CSS3

**Backend:** PHP Laravel, Eloquent ORM, REST API, Java Spring Boot, Spring MVC, Spring Data JPA, Hibernate

**Frontend:** HTML, CSS, JavaScript, jQuery, AJAX, Blade, Bootstrap, AdminLTE, Vite, Responsive Design

**Database:** MySQL, SQLite, NoSQL basics, Database Design, Migrations, Query Optimization

**Tools:** Git, GitHub, VS Code, Composer, Postman, Maven, NPM, Laragon

**Concepts:** PHP OOP, MVC, CRUD, REST APIs, Authentication, Role-Based Access Control, Application Security, Software Troubleshooting, Debugging, Exception Handling, Code Reviews, Testing

**AI & Developer Tools:** Amazon Q Developer, Claude, OpenCode

## Experience

---

**KG Genius Labs – Coimbatore**

*Software Developer Trainee*

- Worked on a real-time garment-sector billing and inventory management project using PHP, Laravel, MySQL, and responsive frontend technologies (HTML, CSS, JavaScript, Bootstrap).
- Developed and maintained billing, inventory, product management, customer management, authentication, and role-based access features for client requirements, applying PHP OOP and MVC principles.
- Built and consumed REST APIs and worked with Magento to manage and validate product catalog data, including product categories, product names, attributes, and related product information displayed on the website.
- Reviewed website product data and verified product catalog information to ensure accurate product names, categories, and details were displayed correctly.
- Worked with the Frappe Python framework to generate business reports and retrieve required data using SQL queries.
- Created and optimized SQL queries and database design for report generation, data retrieval, filtering, and performance.
- Collaborated with the development team on requirement analysis, troubleshooting, testing, code reviews, and technical discussions to deliver client-ready features.
- Used Git and GitHub for version control, code reviews, and collaborative development following best practices.

## Projects

---

**EggShop ERP – Egg Distribution System** | *PHP, Laravel, MySQL, Blade, AdminLTE*

- ERP for egg distribution business to manage customers, suppliers, products, trays, sales and purchase invoices, expenses, and reporting with admin and employee roles.
- Includes dashboard, inventory tracking, invoice management, payment handling, and hosting on InfinityFree with secure authentication and role-based dashboards.
- Designed database schema and backend logic (MVC, PHP OOP) for purchase/sales flows, tray transactions, and daily reporting for business operations.
- Live: eggshop.infinityfreeapp.com | GitHub: github.com/GokulK-24MCA26

**Garment Billing and Inventory Management System** | *PHP, Laravel, MySQL, Bootstrap, jQuery*

- Web application for garment and textile retail to manage products, customers, vendors, sales, purchases, cash bills, returns, payments, and GST reports with barcode support.

- Features product catalog with categories and brands, invoice generation, stock management, customer auto-creation by phone, and HSN reporting for retail and wholesale operations.
- Deployed on Free.je with AdminLTE interface, barcode generation, and responsive billing workflows used in a live retail environment; debugged and resolved production issues post-launch.
- Live: johnsbilling.free.je | GitHub: [github.com/GokulK-24MCA26/Garment\\_Sector\\_Inventory\\_Management](https://github.com/GokulK-24MCA26/Garment_Sector_Inventory_Management)

#### **Bakery E-Commerce Website** | *PHP, Laravel, SQLite, Tailwind CSS, Blade*

- E-commerce website for a bakery shop where customers can browse products by category (cakes, cupcakes, cookies, breads, donuts & desserts), view gallery, and place orders; includes admin dashboard to manage categories, products, gallery, and orders.
- Built with Laravel, Blade, Tailwind CSS, and SQLite with role-based authentication for customers and admins, image upload handling, and responsive design.
- Implemented product browsing, order placement, and admin CRUD workflows with Vite and modern frontend tooling, following clean, reusable, maintainable coding practices.
- Live: gmsbakery.free.je | GitHub: [github.com/GokulK-24MCA26/Bakery-Website](https://github.com/GokulK-24MCA26/Bakery-Website)

#### **Student Management System** | *Java, Spring Boot, MySQL, REST API*

- RESTful backend for managing Departments, Courses, Semesters, Subjects, and Students for college administration; supports complete CRUD operations for each module.
- Built with Spring Boot, Spring Data JPA, Hibernate, and MySQL with layered architecture (Controller, Service, Repository, Entity) and React-ready CORS APIs.
- Implemented data validation, exception handling, and MySQL persistence with automatic schema updates for academic hierarchy management.
- GitHub: [github.com/GokulK-24MCA26/StudentManagement](https://github.com/GokulK-24MCA26/StudentManagement)

### **Certifications**

---

#### **IBM Full Stack Software Developer Professional Certificate** – IBM via Coursera

*IBM (2025)*

- Comprehensive program covering front-end (HTML, CSS, JavaScript, React), back-end (Node.js, Express, Python), databases, DevOps, and cloud-native development with hands-on labs and projects.
- Validated skills in full-stack web development, REST APIs, Git, Docker, Kubernetes, and application deployment; credential ID verifiable via Coursera.
- Tools and technologies: JavaScript, React, Node.js, Python, Flask, Django, SQL, NoSQL, Microservices, CI/CD.

#### **Project Completion Certificate – Garment Billing and Inventory Management System** – KG Genius Labs

*Internship (2025)*

- Awarded for successful completion and deployment of the real-time Garment Billing and Inventory Management System as part of Software Developer Trainee internship.
- Certified for end-to-end contribution: requirement analysis, database design, backend development with Laravel/MySQL, frontend integration, testing, and live deployment on Free.je.
- Recognized for meeting client requirements, delivering billing/inventory/auth modules, and maintaining product catalog accuracy with Magento and Frappe reporting work.

### **Education**

---

#### **KGiSL Institute of Information Management** – Coimbatore

*Master of Computer Applications (MCA) — CGPA: 8.1 (2024 – 2026)*

#### **Gobi Arts & Science College** – Gobichettipalayam

*Bachelor of Science in Computer Science (B.Sc. CS) — CGPA: 7.8 (2021 – 2024)*
